

HEAD IMMobilIZER

DW-FA001A(Adult)

The Head Immobilizer consists of two plastic-coated solid foam supports, an adhesive base plate and two head immobilization straps.

- Specially designed head fixation belt increases the comfort of patients. The adhesive plate is suitable for all wooden, aluminum and plastic fixation plates and spade stretchers. The head support can be used directly on the material fixing plate or spade stretcher.
- It is made of high-density plastic material with large ear holes for monitoring the patient's ear canal;
- It can be used with spade stretcher or spine plate.
- Little interference with X-ray, MRI or CT scan procedures;
- The waterproof plastic coating makes it easy to clean and prevents bacteria from growing on it.
